

Tackling Key City Challenges

Challenge

How to improve the citizens' satisfaction?

Challenge

How to improve efficiency?

Empowering City Managers and Citizens

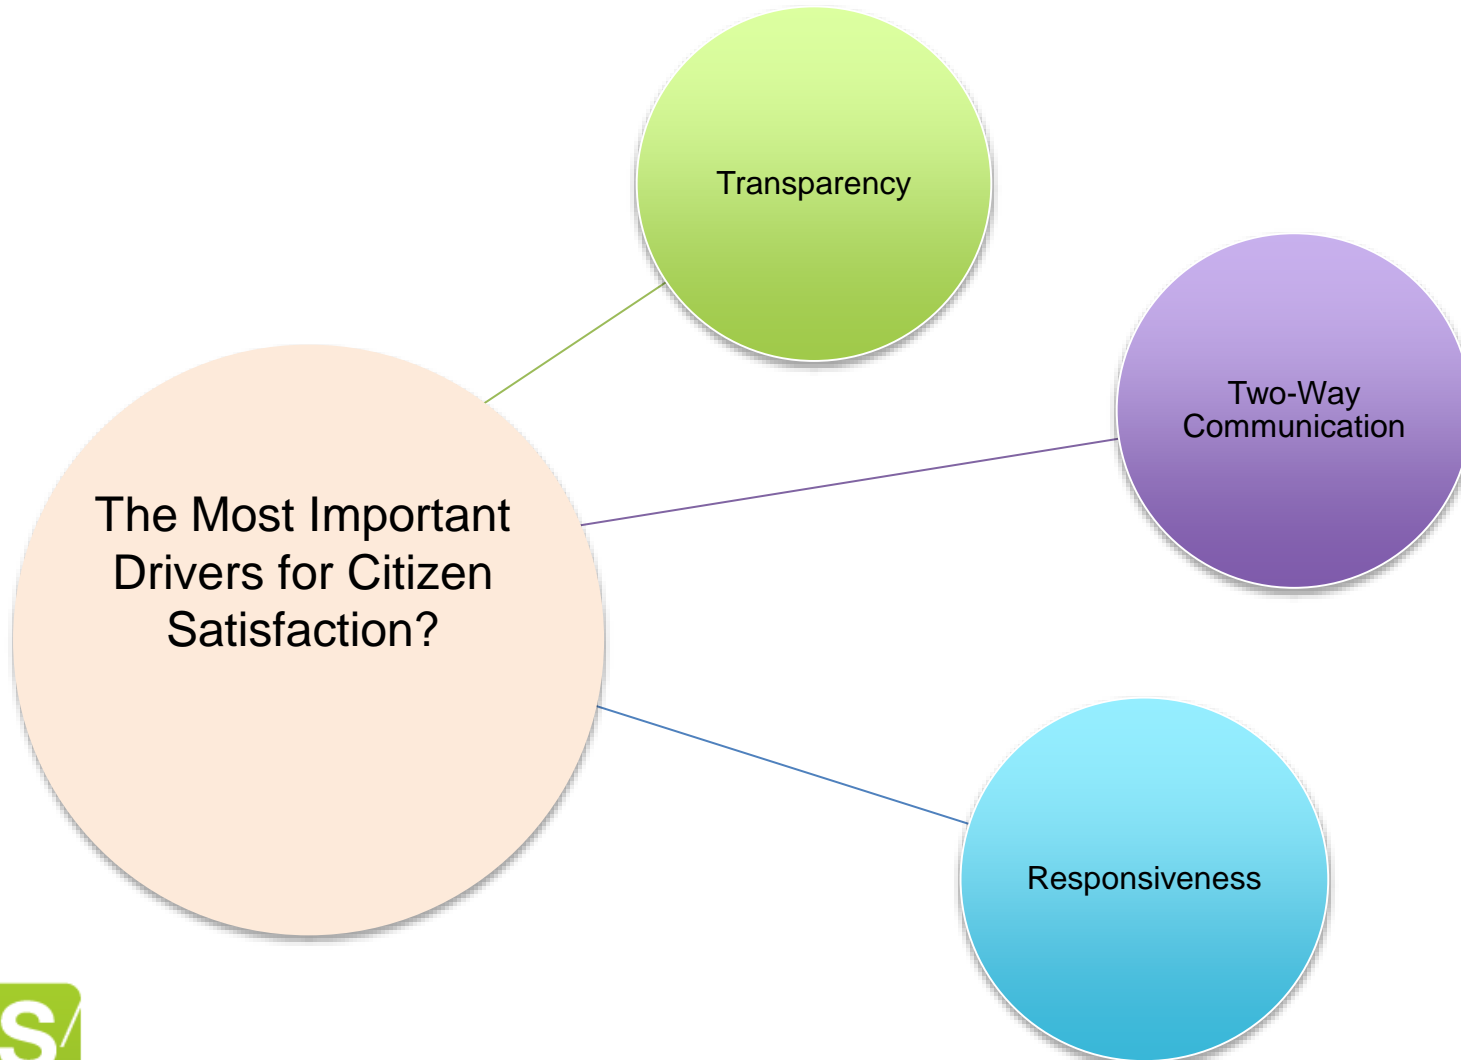

The **SmartCityPlatform** connects all the core elements of a successfully managed city.

It allows the **SmartMayor** to manage urban development, socio-economic development and technological development of the city, measuring and reporting progress in real time.

The screenshot displays the SmartCityPlatform website interface. At the top, the logo 'SmartCityPlatform Power to the people' is visible, along with navigation links for 'Home', 'Sign in', 'Feedback', 'Support', and 'My City'. Below this is a green header with the 'SmartIdea' logo and a search bar. The main content area features a list of ideas:

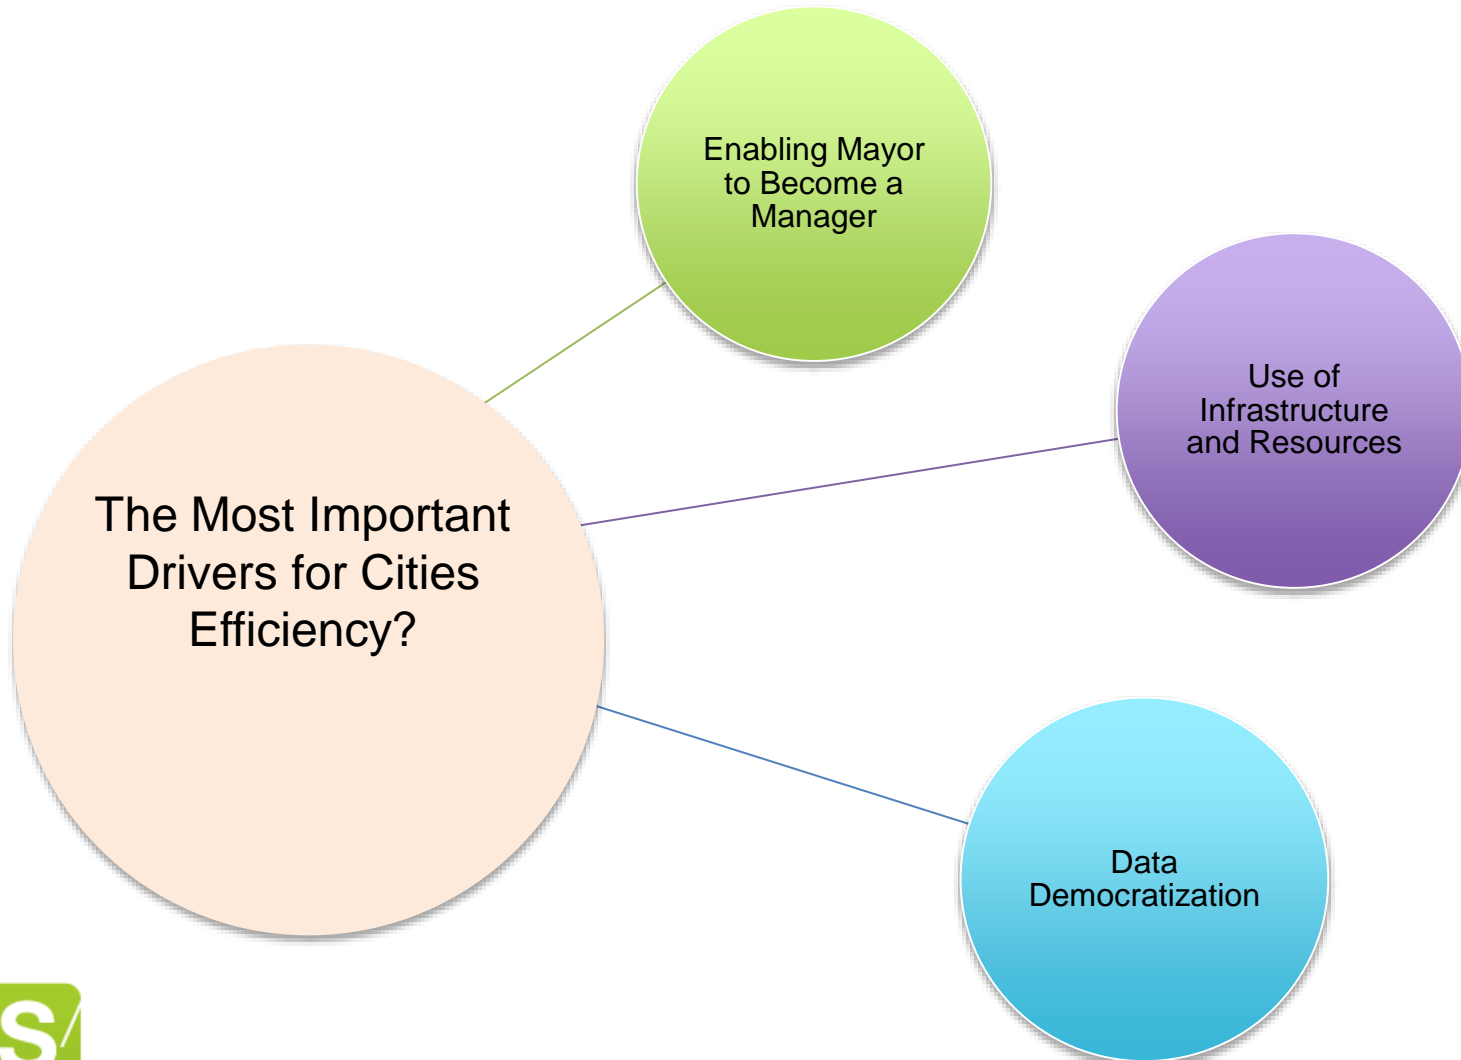

- Idea 1:** 'I want in Ljubljana.' with a 'Create idea' button.
- Idea 2:** 'Graffiti turn to art in designated areas' by 'Ljubljana, Siska'. It includes a photo of graffiti and a 'Learn more' button. A description states: 'We provide real-world design tools and a web-based communication platform. Our goal is to improve the way local organizations, municipal leaders, and residents collaborate to make great ideas happen.'
- Idea 3:** '"How can we make Moste nicer for pedestrians?"' by 'Ljubljana, Moste'. It includes a photo of a park and an 'Answer' button with '34 ideas'.
- Idea 4:** 'Graffiti turn to art in designated areas' by 'Ljubljana, Siska'. It includes a photo of graffiti and a 'Made it happen' button. A description states: 'We provide real-world design tools and a web-based communication platform. Our goal is to improve the way local organizations, municipal leaders, and residents collaborate to make great ideas happen.'
- Idea 5:** 'I want dog friendly parks in Ljubljana.' with a 'Me too' button.

The footer contains the 'SmartVoice App' download links for the App Store and Google Play, the 'Smart City Platform' logo, and a 'Powered by SaaS360' tagline. On the right, there are links for 'Company', 'About', 'Help', and 'Contact'.

What SmartCityPlatform Can Do?

sIOT

Measuring the pulse of the city

- Monitor and manage resources, events and incidents.
- Deep analysis of the city environment and resources.
- Keep citizens safer with crime risk hot-spot analytics.
- Integrate data from various resources through a common platform.

S Data Bank

The SData Bank tool allows the integration of data and their innovative use.
